MARYLAND DEPARTMENT OF NATURAL RESOURCES

Distance : Measure (or estimate if appropriate) distance from nearest road, parking lot, or other access point.

Trash Rating: Scored on scale from 0-20; based on criteria on Stream Habitat Assessment Guidance Sheet

Count …trash, tires, railroad ties, and industrial refuse

Do Not Count…bare soil, AMD discoloration, iron bacteria, rip rap, gabion baskets, concrete trapezoid, etc.

MARYLAND DEPARTMENT OF NATURAL RESOURCES

Trash Rating

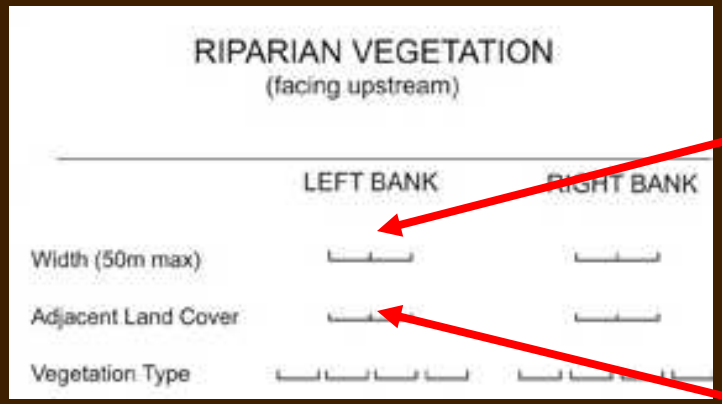
Habitat Parameter	Optimal 16-20	Sub-Optimal 11-15	Marginal 6-10	Poor 0-5
8. Trash Rating [h]	Little or no human refuse visible from stream channel or riparian zone	Refuse present in minor amounts	Refuse present in moderate amounts	Refuse abundant and unsightly

MARYLAND DEPARTMENT OF NATURAL RESOURCES

Surrounding Land Use

• Record any land use type that can be observed while in or alongside the site.

Riparian Vegetation Characterization



Measure width of vegetated riparian buffer on each side of stream. (Max width = 50m)

No vegetation = No Buffer

Record the dominant type of land cover directly adjacent to the riparian buffer.

Riparian Buffer Zone / Adjacent Land Cover Types

Riparian Buffer vegetation

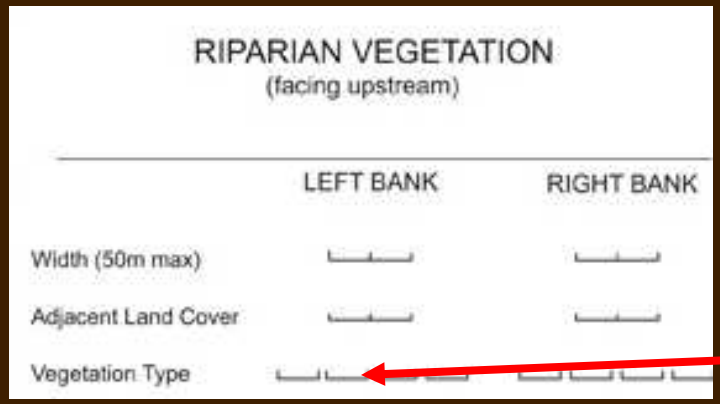
FR = Forest
OF = Old Field
EM = Emergent Vegetation
LN = Mowed Lawn
TG = Tall Grass

Adjacent land cover

LO = Logged Area
SL = Bare Soil
RR = Railroad
PV = Paved Road
PK = Parking Lot/ Industrial/ Commerical
GR = Gravel Road
DI = Dirt Road
PA = Pasture
OR = Orchard
CP = Cropland
HO = Housing

MARYLAND DEPARTMENT OF NATURAL RESOURCES

Buffer Vegetation Type



- Record the dominant vegetation in the buffer
- List vegetation type in order of dominance
- Dominance based on combination of stem density and canopy density.

VEGETATION TYPES

G= Grasses/Forbes
R= Regen Deciduous/Shrubs (<4"dbh)
Y= Young Deciduous (4-12" DBH)
M= Mature Deciduous (12-24" DBH
O= Old Deciduous (>24" DBH)
A= Regen Coniferous (<4" DBH)
B= Young Coniferous (4-12" DBH)
C= Mature Coniferous (12-24" DBH
D= Old Coniferous (>24" DBH)
L= Lawn

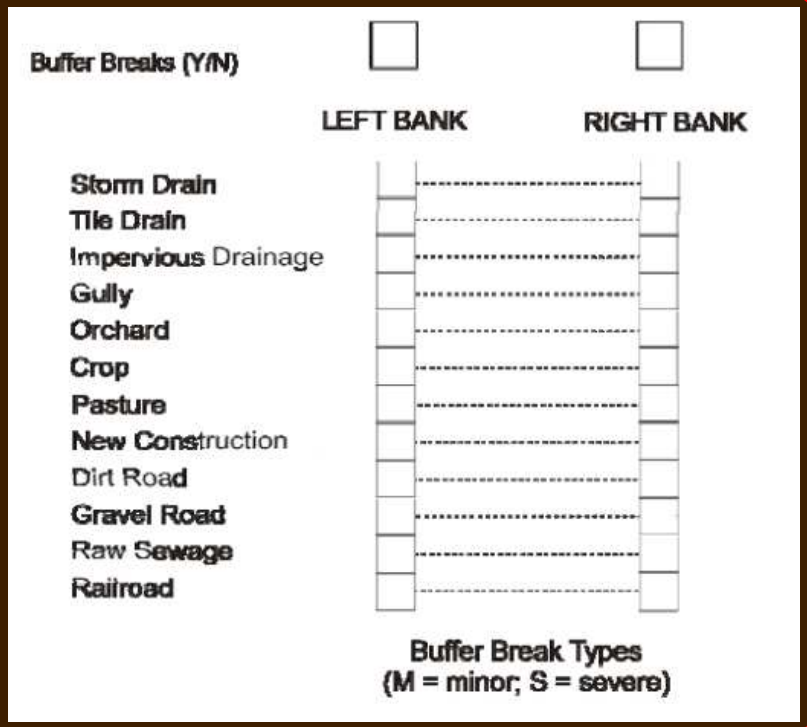
Buffer Breaks



Note any functional breaks in the riparian buffer on each side of the stream.

Indicate the type and severity of break.

MARYLAND DEPARTMENT OF NATURAL RESOURCES

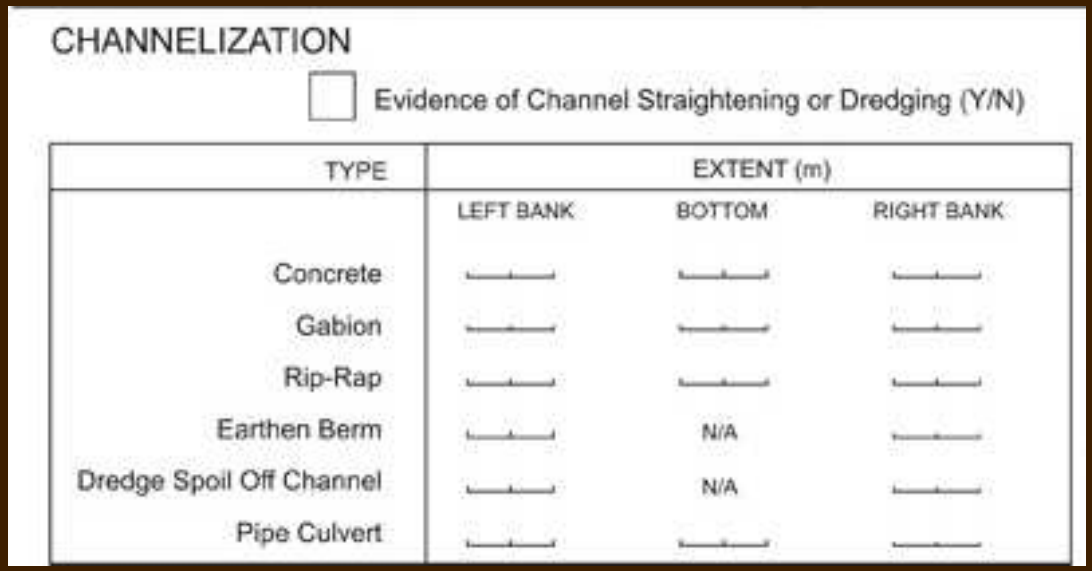
Stream Channelization



CHANNELIZATION

☐ Evidence of Channel Straightening or Dredging (Y/N)

TYPE	EXTENT (m)		
	LEFT BANK	BOTTOM	RIGHT BANK
Concrete	____	____	____
Gabion	____	____	____
Rip-Rap	____	____	____
Earthen Berm	____	N/A	____
Dredge Spoil Off Channel	____	N/A	____
Pipe Culvert	____	____	____

- Survey site for evidence of channel dredging or straightening and
- Indicate presence (Y) or absence (N).
- Indicate the type and linear extent in meters for each bank and for the stream bottom.

Dredge Spoils

Concrete Channel

MARYLAND DEPARTMENT OF NATURAL RESOURCES

Gabion

Rip rap

MARYLAND DEPARTMENT OF NATURAL RESOURCES

Stone / Imbricated Wall

Culvert

MARYLAND DEPARTMENT OF NATURAL RESOURCES

Road Culvert

ROAD CULVERT

Present in Segment? (Y/N) ☐

Sampleable? (Y/N) ☐

Width of Culvert? (m) ☐☐

Length of Culvert? (m) ☐☐

If the road culvert is NOT sampleable,…

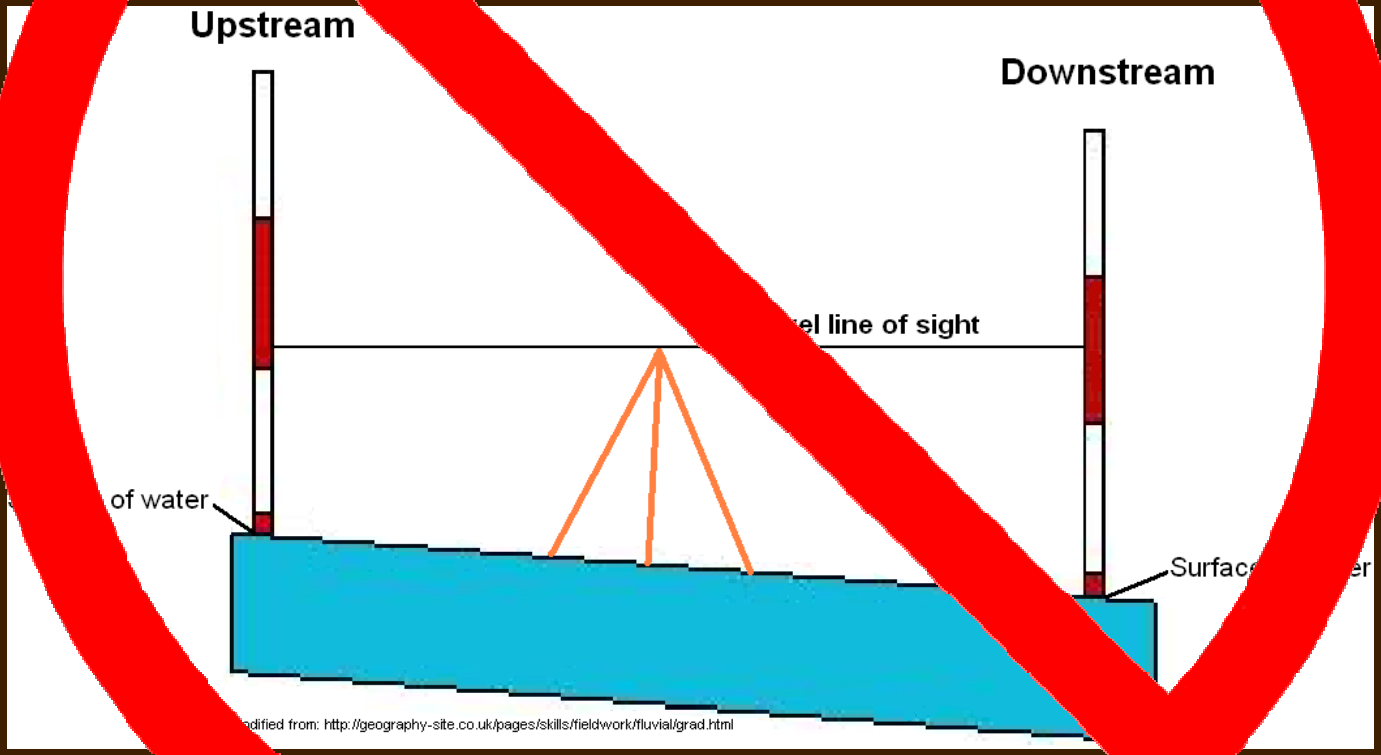
1) measure the linear length of culvert
2) add the measured distance to whichever end of the site is closer.

Sampleable

Not Sampleable

MARYLAND DEPARTMENT OF NATURAL RESOURCES

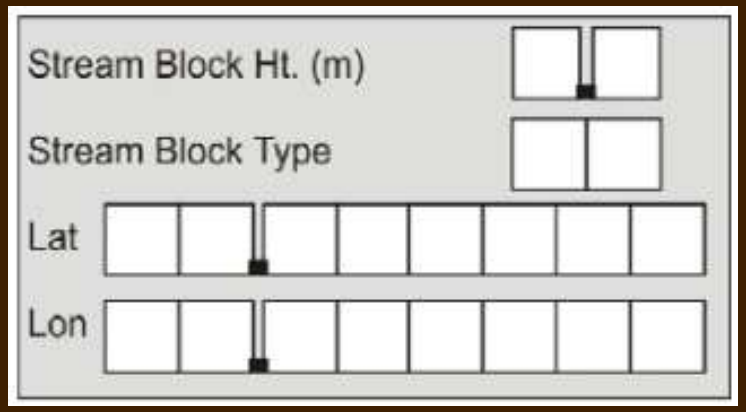
Stream Gradient



MARYLAND DEPARTMENT OF NATURAL RESOURCES

Stream Blockages

- Note on the data sheet the lat/long of any man-made migration barrier near the site.
- Also note height and type of blockage



MARYLAND DEPARTMENT OF NATURAL RESOURCES

Vernal Pools

We also record presence/absence of vernal pools at every site

- Recorded on Spring Index Period Data Sheet

Definition:

Any well established seasonal/ephemeral pool, pond, or wetland

1. Small size
   - 1 m^2 to 4000 m^2 (1 acre)
2. No permanent surface water connections
3. Subject to seasonal drying
4. Supports a distinctive biological community
